

# Inspiring learners to explore, prepare and connect on their career journey.

Equipping communities as they go on their career journey is at the heart of what we do. We help each stakeholder in 4 key ways.

## INSPIRATION

CINEMATIC STORIES INSPIRE CAREER EXPLORATION

## EXPLORATION

EXPLORE DIVERSE CAREER PATHWAYS

## PREPARATION

STEAM, SOFT SKILLS, CTE/SHSM

## CONNECTION

COMPANIES, CAREERS, SCHOOLS, TRAINING PROGRAMS

### Inspiration

The Inspiration library is packed with award-winning films and TV shows. These real-life stories feature extraordinary people using their heads, hands, and technology to push back the edge of what's possible. It's the catalyst for students and adults alike to imagine what their future could look like.

### Exploration

In Exploration people dig deeper as they explore diverse industries and career pathways with high-impact profile videos, and interactive activities. Things can get even more localized if workforce development has a community page because students, parents and job seekers will be able to view listings of local companies and schools in their own community.

### Preparation

The Preparation library is filled with media specifically designed to help students prepare for the workforce. From videos and activities that connect STEAM to the real world, to the incredibly important library of soft skills, ethics, and employability skills. Browse local training options for the industry you are exploring including technical programs, post-secondary courses, apprenticeships, and more.

### Connection

Connection is where Edge Factor provides schools, businesses, workforce development and community leaders, the ability to customize our platform with local information. These tools help people to promote priority careers, industry and showcase their local companies, jobs, schools and training opportunities.

Whoever you are, student, job seeker, parent, educator, employer, or community leader, Edge Factor provides the tools you need to push back the edge of what's possible.
